Reviewer 3

1. Comment: This review is very interesting and worth in the field of Otolaryngology. If possible, please change Respiratory Conditions to Upper Respiratory Conditions, since in this review, the authors mainly discuss the influence of saline/seawater in the treatment of upper airway diseases.

Response:
This was corrected. We were added Upper in the title as follows.

Before	**Now**
The Role of Seawater and Saline Solutions in Treatment of Respiratory Conditions	The Role of Seawater and Saline Solutions in Treatment of Upper Respiratory Conditions
