Response to Reviewer 3 Comments

**Point 1**: This paper proposes a new approach to outlier detection. The paper has technical merit, however, the English should be revised thoroughly before publication. For instance, in the Abstract: "...is to identify outliers in datasets and extract potential information in the datasets." --> "...is to identify outliers and to extract potential information in the datasets." and many more.

**Response 1**: We thank you for the positive comments about our work and manuscript, which improves the quality of our manuscript. We updated our paper by proofreading the manuscript word by word many times, and we have tried our best to improve the language presentation and readability of our paper. And the corresponding parts are marked in yellow in the manuscript.
