Response to Reviewer 2 Comments

Comment 1: The manuscript "Sustainable Exploitation of Apple By-Products: A Retrospective Analysis of Pilot-Scale Extraction Tests Using Hydrodynamic Cavitation" is quite interesting and worth investigation. It was improved significantly, when compared to previous versions.

Response 1: Thank you very much for your appreciation of our manuscript!

Comment 2: I agree with academic editor. Complementary analysis should be carried out or a deeper discussion and/or analysis should be done.

Response 1: Response has been provided to Academic Editor's comments.
