Dear Reviewer,

Thank you for your kind response about our manuscript (*Polymers-2048406*) entitled **"Enhanced Organic Pollutant Removal Efficiency of Electrospun $NiTiO_3/TiO_2$-Decorated Carbon Nanofibers".** The comments were helpful to strengthen and restructuring the manuscript. We have now modified the manuscript according to the given comments. To facilitate following the changes in the revised manuscript, we have marked them in yellow color. We hope our responses will address all the comments in a comprehensive manner. It will be our pleasure to respond further in case more clarifications are required.

Thank you very much.

Sincerely,
Dr. Ibrahim Maafa

Response to reviewer:

The work is interesting. The work demonstrates about the Enhanced Organic Pollutant Removal Efficiency of Electrospun NiTiO3/TiO2-Decorated Carbon Nanofibers. I think it will be published in the current journal after modification the issues raised .

Item #	Reviewer comment	Amendment
1.	In the abstract there are mixing of present and past form of tenses. Its totally wrong. It should be one particular form.	We thank the reviewer for his/her valuable comment. The whole manuscript has been reviewed and extensive English editing has been performed.
2.	There is a wrong choosing of keywords. One word should be used as one word or maximum two.	We thank the reviewer for his/her valuable comment. The keywords are now modified as follows: Electrospinning; Nickel titanate; Nanofibers; Photodegradation; Mathematical modeling.

3.	In figure 10, the schematic image needs to be more clear.	We thank the reviewer for his/her valuable comment. The image has been modified. 4.	The ref list needs to be MDPI styles	We thank the reviewer for his/her valuable comment. The reference styling has now been changed to MDPI style.
5.	There are many grammatical mistakes. The English needs to be rechecked and make it more corrections.	We thank the reviewer for his/her valuable comment. The whole manuscript has now been reviewed and extensive English editing has been performed.
