

Response to Reviewer #1

Reviewer #1: Page 2; the authors describe the structure of Ferritin and refer to the Figure 1 but the Figure 1 in the manuscript on page 4 displays the Magnetization curves of the three magnatoferritins which must be the figure 2.

Thank you for the comment. Indeed, Figure 1 in the older version of the manuscript did contain a picture of ferritin, but due to a large number of images in the results, we decided to omit this image, but forgot the link in the text.

Reviewer #1: Page 9 : in figure 9, the title of the axis of the abscissa is wrong, vitamin B12 concentration instead of vitamin C concentration.

Thank you, it was an inattention mistake. The title of the x-axis in Figure 9 has been corrected.
