Reviewer 3

Dear Authors,

your manuscript is interesting and overall informative. Still some points need to be amended. Please find as an attachment the PDF of your manuscript with comments and suggestions. In addition, I think your manuscript would improve by adding one more Figure related to the first part.

Best regards

Response:

We thank the reviewer for these very important points and helpful suggestions. We have re-paraphrased the manuscript according to the advice given by the reviewer. The manuscript has been edited by Paperpal for grammar issue. Moreover, we have added a new Figure to the first part to describe the difference between PKM2 and other pyruvate kinase isoforms in metabolic reprogramming.
