Comments and Suggestions for Authors

Dear Authors,

Thank you for submitting the manuscript entitled: Isolation and characterization of indigenous Acetobacter strains from cashew apple and their potential use as vinegar producers in Côte d'Ivoire**.** The study is very interesting; however, corrections will be required before the manuscript can be considered for publication,

(1) I propose that the title be modified to: Isolation and characterization of indigenous Acetobacter strains from cashew apple and their potential use in vinegar production. There is no need to indicate the name of the country since Acetobacter strains are not only available in Côte d'Ivoire.
(2) Abstract, line 24 must be revised because authors are talking of Côte d'Ivoire and worldwide. Line 31, remove (05), line 70, should be "Africa" not African.
(3) Under introduction, line 49, remove ((https://lpsn.dsmz.de/genus/acetobacter); accessed on 17 August 2024), I guess it should be Figure S1 not A1 since it is a supplementary material. Line 77, what is nov just before [12]? Basically, the introduction is well-written and the knowledge gap has been identified. Authors were able to highlight previous studies done related to their work.
(4) Under materials and methods, very sound and clear
(5) Results and discussion, I do not see the relevance of lines 235-250 because they are not part of the results. Discussion must be based on the results of the study rather than explaining the methodology of the study as observed in lines 245-250. Otherwise, the discussion has been explained in detail.
(6) Conclusion, remove references in lines 435 and 441.
