Review sports-1101902 R1 N. Imai, Y. Kobayashi, K. Uenishi "The intake of kiwifruits improve the potential antioxidant capacity in middle- and long-distance runners routinely exposed to oxidative stress in Japan"

The authors revised their manuscript according to the comments of the reviewers and thus improved it.

However, there are still some points to be corrected to further improve the quality of the manuscript:

Line 122: please change "radicals are oxidize" into "radicals oxidized"

Line 123: please change "converted to colored" into "converted it to a colored"
