Review 2
Comments and Suggestions for Authors
The revised version of this article seems to me much more satisfactory, since substantial modifications have been made and improve the whole.
We thank the reviewer for the positive evaluation.
All the minor points have been considered and we would like to thank the reviewer for the punctual changes suggested that further improved the writing.
A further re-revision by a native English speaker was done

Some minor changes must be taken into account:
L22: BoNTs act or BoNT/A acts.
Correct
