

polymers-1146821

The manuscript could be accepted for publication in Polymers after major revisions. At the moment the manuscript is not interesting to read and should be briefed. Duplication between the text, figures, and tables should be avoided. For example, the following comments should be answered.

- 1) Line 20-22: the sentence should be simplified and briefed. For example, it could read: "The chemical structure of the compound has been verified".
- 2) Page 5: The energy dispersive spectrum (Figure 1b) can be moved to the supplementary material.
- 3) Page 6: The NMR spectra (Figure 2) should be moved to the supplementary material.
- 4) Page 8: The FTIR data has been provided in details in table 2 and represented in Figure 4. Remove Figure 4 and move to the supplementary material.
- 5) Page 9: Move Table 3 to the supplementary material.
- 6) Page 13: Move Figure 8 to the supplementary material since the data is presented in Table 4.
- 7) Page 14: Move Figure 9 to the supplementary material.
- 8) Line 506: Correct the error "[]". Either remove the brackets or add the reference number.
- 9) The conclusion should be briefed and simplified. It should concentrate in the most important findings of the study.
