List of response to the reviewer's comments

Dear editor,

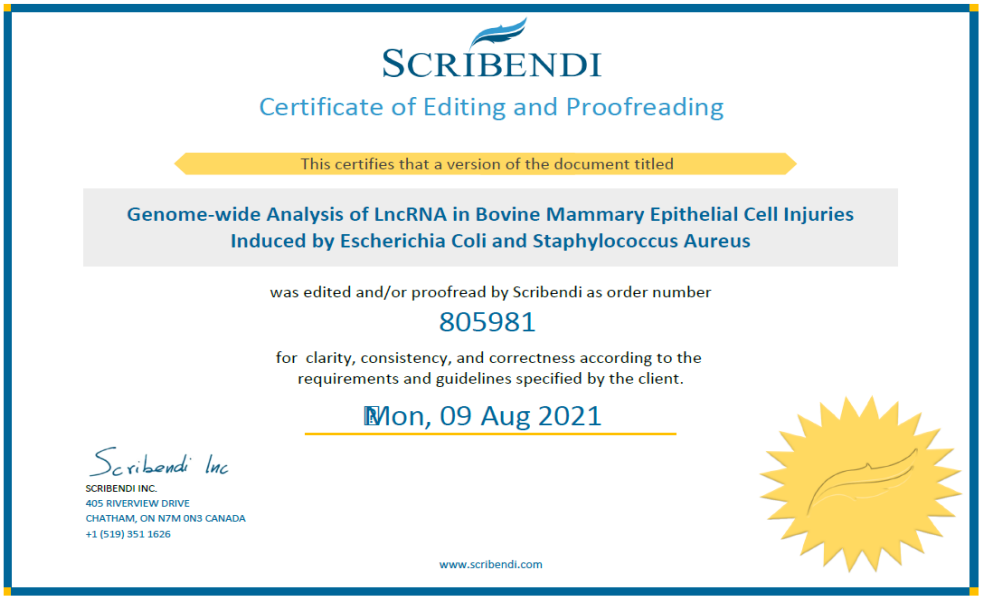

Thank you very much for your decision letter and advice on our manuscript (ijms-1337584) entitled "Genome-wide Analysis of LncRNA in Bovine Mammary Epithelial Cell Injuries Induced by *Escherichia Coli* And *Staphylococcus Aureus*". We also thanks to the reviewers for the valuable comments and suggestions. Accordingly, we have discussed comments carefully and have made correction which we hope meet with approval. All amendments are highlighted in red in the revised manuscript. The main corrections in the paper and the responds to the reviewer's comments are as following:

Response to Reviewer 2 Comments

The study proposed by Lin and colleagues is very interesting and it provides to amplify the knowledge of the *E.coli* and *S. aureus* epidemiology which cause mastitis in cows, thank LNCRNA research.
The study is well conducted and I don't have any comment concerning it. However, the English must be revised before publication.

Point 1: However, the English must be revised before publication.
Response: Thanks for your suggestion.

The English language were revised extensively by English editors, and the English Editing Certificate was provided.
