Response to Reviewer 3 Comments

” The manuscript is interesting, almost clear, balanced and well organized. However the main lack is english language. The manuscript must deeply revised by a native-speaker (just as example, line 20: "materials... has been...").

After that it can be reconsidered for publication.”

Dear reviewer,

Thank you very much for your positive feedback. You ask to clarify more details on the magnesium alloys, which certainly would give an improvement for our research. We have tried to correct the English as you mentioned and we hope now is better.
