

The article subject is extremely interesting; however, it isn't well explained.

Authors are kindly required to take into consideration the following remarks:

- The digital technologies mentioned in the title must be well explained in this article as well as the way in which they are implemented (target, language, method, comparisons, ...);
- Introduction section is too long; authors are friendly requested to use short and simple sentences.
- Results and limitations of previous methods should be presented in order to highlight the adopted method;
- Acronyms like GHG should be explained;
- Line 77 is not clear;
- Capital letters should be verified (line 98 .. 121), (line 237 .. 241), page 13 and page 16.
- Figure 2 should be placed in the same page 5 or 6.
- Indirect speech is recommended instead of "we" (line 276).
