Response to Reviewer 2 Comments

Dear Reviewer,

Thank you for your comments concerning our manuscript entitled "Prediction of China's Grain Consumption from the Perspective of Sustainable Development -- Based on GM(1,1) Model "(sustainability - 1813268). Those comments are all valuable and very helpful for revising and improving our paper, as well as the important guiding significance to our researches.
We have studied comments carefully and have made correction which we hope meet with approval. Revised portion are marked in red in the paper. The main corrections in the paper and the responds to the reviewer's comments are as flowing:

Point 1: The objectives of the paper are still too general one and it is necessary to make them more specific and to specify methodology with respect to individual sub-objectives.
Response 1: The research objectives have been clearly stated in the abstract and introduction of the article, and the research methods have been also explained there.
Point 2: The second problem is represented by extremely brief conclusion. The final conclusion is still too poor and disappointing.
Response 2: The conclusion of this paper have been enriched at the end of the article, mainly concluding the factors related to grain consumption, such as grain trade and grain price, which have been deeply analyzed and summarized.

Special thanks to you for your good comments.
