

SUMMARY:

The paper proposed a new method for the calibration of tactile pressure sensors with 8-bit sensels' output.

SPECIFIC COMMENTS:

Section 1 (Introduction): After the discussion of the state of art, the contribution of the paper is not clear with respect to the other previous works. What is the novelty of your paper? What are the differences with the other works? Explain how your work fits within the state of the art. (insert this part starting from line {141})

{172}: You have to explain better since it is not clear.

Section 3 (Experimental Equipment and Data Acquisition): Explain what the parameters A and b are. Explain R_T and $Q_T(l)$. In general, try to explain better all the variables and parameters used in the demonstration.

GENERAL COMMENTS:

Grammatical errors and misspellings were founded in many sentences.

The sentences are too long in many parts of the paper, please revise all sentences that exceed 2,5 lines for understandability.

The English proofreading is strictly recommended.
