

Dear Editor and referees,

Thank you very much for your comments. We think that they are very valuable and help to improve the manuscript quality. We have addressed the major concerns and we hope that it is suitable for publication.

Please find below our point-by-point response to the reviewers' comments.

REVIEWER #2

The submitted manuscript is very interesting. Can be really disseminating for the readers. Each section is carefully and neatly written. No drawbacks or flaws can be found in it and it fulfills all the conditions of a good scientific paper.

I would love to accept 'as is', but a few tiny edits are necessary. Namely:

I. 45-46: stands 'some of those...' instead of 'some of the...'

Thank you for the suggestion. We have corrected it in the revised manuscript.

I. 100-107 Two paragraphs containing the template indications are left undeleted. Please remove.

Sorry for this mistake. We did not remove this from the template. We have now removed these paragraphs in the revised version of the manuscript.

I. 350: stands 'his...' instead of 'this'

Thank you for the comment. We have modified the sentences as we have realized that it was too long.

References are not formatted according to the journal style

Thank you for the suggestion. We have formatted the references according to MDPI style in the revised manuscript.
