Response to Reviewer 3 Comments

Dear reviewer:

Thank you very much for your suggestions; they have helped me improve the quality of my paper. I have corrected the errors in my paper and followed your suggestions. These changes are shown in red font in the revised paper. In this letter, I have responded to your questions. Please let me know if I need to make additional changes to my paper.

Point 1: It is recommended to use the standard term of the additive manufacturing process instead of selective laser melting (SLM). The ISO/ASTM standard of this process is laser-based powder bed fusion of metals (PBF-LB/M), according to ISO 52911-1 standard.

Response 1: Selective laser melting (SLM) technology is one of the development directions of laser additive manufacturing (LAM) technology, which is a branch of LAM technology. Therefore, this article applies the name of SLM more specific.

Thank you again for taking the value time to review my paper.
