# Response to Reviewer 1 Comments

Dear reviewer,
Thank you very much for the positive evaluation of our manuscript. Reviews like yours move us forward and motivate us in our further work.
The responses to the individual points of your review are as follows:

**Point 1:** This is a well-organized manuscript.

**Response 1:** Thank you very much for your positive comment. We really appreciate it.

**Point 2:** The research questions are valid.

**Response 2:** Thank you very much for your positive comment.

**Point 3:** The introduction is theory based, **but it's lack sufficient information about the previous study findings is presented for readers to follow the present study rationale and procedures.**

**Response 3:** Dear reviewer, thank you very much for your comment. We agreed with your opinion and additional previous study findings in the research field examined were added to the manuscript.

**Point 4:** A multiple regression model was used and adequately tested.

**Response 4:** Thank you very much for your positive comment.

**Point 5:** The suitability of the proposed model was adequately tested using the ANOVA method.

**Response 5:** Thank you very much for your positive comment.

**Point 6: Figures and tables don't accurately represent the results, but they have to be presented more accurate and adequate.**

**Response 6:** Dear reviewer, thank you very much for your valuable comment. All the tables in the manuscript have been replaced to adequately present the results.

**Point 7:** The language is clear and understandable.

**Response 7:** Thank you very much for your positive comment.

Dear reviewer, thank you again for all your comments and suggestions, they have been very helpful.
