

Comments and Suggestions for Authors

Dear Authors,

The article "**The Forces Behind Green Innovation That Stimulate Green Total Factor Productivity: An Perspective in the Context of Sustainable Development Goals**" covers the topic of sustainable practices and green innovation in China's manufacturing companies.

Strengths of this study:

- the topic of the paper is very important in the context of green total factor productivity,
- the paper is well structured,
- the applied methods are adequate for the purpose of the research.

Response: Dear reviewer we are highly thankful for your encouraging comments and for your time to evaluate our paper.

My recommendations and suggestions:

- the authors could shorten and reformulate the title of the article to better reflect its content,

Response: Dear reviewer we have updated the title of the paper by following your suggestions.

- the purpose of the research as well as the temporal and space scope of the research and used research methods should be specified in the abstract,
- the research questions which are formulated in Abstract and Introduction should be more sufficiently consistent with the research hypotheses.

Response: Dear reviewer we have updated the abstract according to your guidelines.

- in my opinion the authors should characterize the research sample in more detail,

Response: Dear reviewer we have added more details about research sample. Thank you.

- it would be good to expand part 3.3. Empirical models.

Response: Dear reviewer we have updated the empirical models according to your guidelines.

In my opinion this paper qualifies to be published in Sustainability after introducing the suggested corrections.

At the end, we must say thank you again. Your valuable suggestions really helped us to further improve the quality of the paper. Thank you and stay blessed.
