

This table was developed to show the comments of the reviewer in the left-hand column and the author's responses to the suggestions and recommendations in the right-hand column.

Table of Revisions

Comments from Reviewer 1	Author's responses
<i>Reviewer 1</i>	
Make sure you are using a consistent format style throughout the manuscript. (For example, see the title format, page 9, line 408.)	The example isn't a title. It's a concept with italics for emphasis. But I did several more proofings of the manuscript to ensure that the format is correct throughout.
Suggest making it clear that it's a conceptual piece.	I added some sentences early in the article to clarify this.
