Response to Reviewer 3 Comments

We would like to thank the reviewer for the comments. The revisions that we have made are as follows:

Point:
Thank you for your revised submission, addressing many of my comments, including the interview guide as supplementary material, adding more detail to your data analysis section, and expanding the limitations and conclusion sections. I feel your manuscript is much stronger now. One minor comment that I didn't feel was fully addressed:

1. I appreciated you citing the reporting guidelines by O'Brien et al. Many qualitative studies also have one sentence in their methods section stating something like "We followed the Standards for Reporting Qualitative Research guidelines for this study [18]." I would strongly suggest you do this. After doing so, double check the list of 21 standards to confirm you have indeed reported everything.

Response: We have added the sentence that you have suggested to the study design and participants: “We followed the Standards for Reporting Qualitative Research guidelines for this study [26].” (lines 89-90).We confirmed that our paper covered all items of the list.
