

Dear Authors,

the manuscript *Candida auris: A Continuing Global Threat* by Ashish Bhargava 1,2,\* , Katherine Klamer 1\* , Mamta Sharma 1 , Daniel Ortiz 3 , and Louis Saravoltaz 1,2,\* has been revised.

It focuses on the current situation of the *Candida auris* pathogen worldwide to provide guidance for further researches.

After the revision of the manuscript, I do not recommend publishing this study in presented form for several reasons provided below:

- The Introduction section should be supplemented with more detailed data on the distribution of *C. auris* in different countries of the world, as the title of the article requires. However, the Authors should take into account recent publication (review) of Microorganisms <https://doi.org/10.3390/microorganisms12050927>, on the analysis of the same fungus strain.
- It is not clear how the Authors selected the reference database and what the search strategy was? It should be discussed.
- Please remove 4 Henry Ford Health - St. John Hospital, Detroit, MI from the affiliations or specify which author corresponds to this affiliation.
- All Latin names of fungi and bacteria should be written in Italic.
- P5: Figure 1 is too large. Please, reupload a more appropriate one.
- Ref. [80] is not cited.
- P8: As for Figure 1, Figure 2 should be reduced.
- P10: Table 1 needs to be presented more neatly. Next, The data of Rezafungin is not provided in Ref.[91]. Please check it and correct if necessary. The same for Polyenes.
- L407-409: mL instead of ml.
- L408: anidulafungin instead of anidulofungin.
- L424: ...[94].
- Paragraphs L436-445 and L441-445] should be cited.
- References [99] and [100] must be cited consecutively but not after [86] and [88].
- Ref[1]: Journal title should be included.
- Ref[4]: Chow, Nancy...
- Ref[5]: publication year should be included.
- Please check all references and unify the submission of journal titles: submit either abbreviated or full titles for all references.
