Response to Reviewer Comments

Point 1: Even though the addition of Ag is a kind of motivation, the motivation of the present work has to be emphasized and should be clear.

Response 1: We have listed the aims of this work in manuscript.

Point 2: All data points should accompany with error bars

Response 2: We have revised the Figures.

Point 3: English language should be polished

Response 3: We have requested a native English expert to revise the language

Point 4: Typos should be checked carefully

Response 4: We have revised the manuscript again and again.
