

No	Reviewers' comments	Authors' response
Reviewer # 4		
General comments: Thank you for your very useful comments, suggestions and modification of the manuscript. <i>The manuscript has been extensively revised to improve the overall quality and at same time to take into consideration the comments and criticisms from the reviewers.</i>		
	Technical Comments:	
	Comments and Suggestions for Authors The work presents and describes various sources of construction waste. The triangulation method was used to analyze them. One of the three elements is the conducted questionnaires. It would be interesting to present what the sample questionnaire used in the study looked like. The results are presented clearly and comprehensively analyzed.	Thank you for your very useful comments, suggestions and modification of the manuscript. <i>The manuscript has been extensively revised to improve the overall quality and at same time to take into consideration the comments and criticisms from the reviewers.</i>
