Response Letter and Summary of Changes

We thank the reviewers for their helpful comments and suggestions to improve the manuscript. Changes were made in the revised manuscript (highlighted in red for easy identification) according to the reviewers’ comments. The following summarizes our responses to the points raised.

Reviewer 3:

- As a very minor point, I would suggest a re-phrasing of line 283: from "To better understanding the role of improvement of visible light absorption" to "In order to better understand the enhancement of visible light absorption".

Thanks for the useful comments. The comment has been implemented in the revised manuscript.
