Dear Reviewer

Thank you for your time and effort spent on reviewing the paper. Again, your comments proved very valuable in that they enabled us to improve the overall quality of the manuscript. Within the revised version, our responses are rendered in red.

Thank you for reading the last version.

Kind regards
Petr Marcon

Comments and Suggestions for Authors

Dear authors, thanks for the modifications. I still find the article confusing in some points and I still do not see clearly why you choose WiFi instead any other communications. You haven't understood my 5th comment, I refered here to a table for the explanation or justification of the use of WiFi technology.

In any case, the article has improved a lot.

Thank you for the comments and assessment. We have now included Tabs. 2 and 3 to compare the communication technologies. The relevant explanation is that WiFi was used due to the applied OPC UA. We hope that we understood your comment correctly and that the corrections are sufficient.

Thank you for substantially helping us to reveal and eliminate some of the weaknesses that might have been present within the text.
