

Response to Reviewer 3 Comments

Point: The presented manuscript is well written and contains useful and interesting results regarding the effect of chlorogenic acid on the physicochemical and functional properties of oxidized *Coregonus peled* myofibrillar protein. I have only a one shortcomings: In the reference list the names of journals should be written in upper case. For example Food Chemistry and others.

Response: Thank you very much for your good evaluation and detailed suggestion. The reference list the names of journals have been revised upper case. (Page 11-13)

Once again, thank you very much for your comments and suggestions.
