Responses to reviewer-1

Dear reviewer,

We deeply appreciate your comments and suggestions. We have carefully revised our previous manuscript in accordance with your suggestions. A point-by-point response is given as follows.

Point 1:

I have only two notes/recommendations which can contribute to clarity and readability of the text:

1) The assumptions written at rows 132-136 should be marked by bullets

Response 1:

The corrections are made and highlighted in yellow.

Point 2:

2) Equations cited directly in the text should be written in form e.g. "eq. 10" instead of "(10)" in my opinion

Response 2:

The corrections are made and highlighted in yellow.

Special thanks to you for your suggestions.

Best regards.

Yours sincerely,

Xiaoyu He
