

I don't understand while the authors say that MPC is an heuristic control strategy. It is not at all!!!

Also, I miss more MPC literature, such as Rawlings's book, Camacho's book, Grune's book, etc

Answer: The authors feel sorry for making such a mistake, and we have deleted the word "heuristic". Please see Line 85 to 86.

In this paper, one of the highlights about MPC method are that a dynamic multi-objective genetic algorithm, named as CPDMO-NSGA-II is proposed to realize on-line optimization in MPC, and the proposed dynamic multi-objective genetic algorithm is a heuristic optimization algorithm.
