The article is well written, although the formal structure should follow a better organization and the same rules should be used in all line spaces and in what concerns to spaces between titles and text. This kind of mistakes happens on point 3.1.3.1. Health and Hygiene.

Authors should also leave spaces between paragraphs (this doesn't occur between the lines 110 and 111; 111 and 112; 112 and 113; 118 and 119; 119 and 120; 129 and 130; 156 and 157; 162 and 163; 169 and 170; 175 and 176; 180 and 181; 194 and 195; 225 and 226. It also occurs further in the text, between lines 442 and 443; 447 and 448; 453 and 454; 457 and 458; 460 and 461; 467 and 468.

On Figure 1 the word "turism" should be changed for the word "tourism". On the same Figure, the source and year of publication should also be mentioned in the bottom.

Conclusions (5.) are detailed and clarifying, although, language of first paragraph should be adjusted and changed for a less personal language. The suggestion is to eliminate the word "you" (line 441).
