Responses to the comments from the editor and reviewers

The authors improved the manuscript. However, several mistakes still can be detected - examples:

IC50 - the number must be underscript

**Response:** Do accordingly.

line 140 - italics in R and S in the name of the compound

**Response:** Do accordingly.

line 62

**Response:** Do accordingly.

Therefore, all manuscript must be re-read and reviewed again to be improved.

**Response:** The manuscript was re-read and reviewed, and the mistakes were corrected which could be observed through "Track Changes" function in word.
