Dear Reviewer,

We would like to express our sincere thanks to you for your time and efforts in reviewing our work. Thank you very much for your positive comments. They were gratifying. To improve the quality of the work, we have carefully revised the paper.

1 Individual report to questions raised by reviewer

1. It would be interesting to show an exemplary comparison of raw healthy and faulty signals of the point machine.

   Your comment is appreciated. According to your comment, we have added a figure to show an exemplary comparison of the normal and fault signals to promote its understanding. You are kindly invited to look it up in the newly submitted revision.

2. It would be easier to distinguish class separations in 4-6 if Class 2 is e.g. in yellow instead of orange which is close to the faulty case in red.

   We are thankful to your suggestion and fully agree with your comments. According to your comment, Class 2 is painted in black instead of orange in Figure 5, 6, and 7 in the newly submitted revision. After the modification, we find that the new figures are more clear and the readability is improved.
